

Saamy Mishra

B.Tech Computer Science (Software Engineering) Student

Generative AI & Agentic AI Developer | Python • RAG • LangChain • OpenAI APIs • LLM Applications

Jaipur, Rajasthan | mishrasaamy72@gmail.com | linkedin.com/in/saamy-mishra-575788396 | github.com/mishrabishu120-dot

PROFESSIONAL SUMMARY

First-year B.Tech Computer Science (Software Engineering) student with a passion for Generative AI and Agentic AI. Experienced in developing AI-powered applications using Python, NLP, embeddings, and LLM-based workflows. Skilled in RAG systems, OpenAI APIs, prompt engineering, and multi-agent architectures. Strong problem solver with a drive for innovation.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering (Software Engineering)

Expected: June 2029

NxtWave Institute of Advanced Technologies × Vivekananda Global University, Jaipur

SKILLS

Programming: Python, C++, JavaScript, SQL, MongoDB, React, HTML, CSS

AI & Machine Learning: Generative AI, Machine Learning, Deep Learning, Natural Language Processing (NLP), Prompt Engineering, Retrieval-Augmented Generation (RAG), Embeddings, Vector Databases, LLM Evaluation

LLM & Agentic AI Tools: OpenAI API, Claude, GPT-4, Llama, LangChain, Hugging Face, AI Agents, Multi-Agent Workflows

Development: REST APIs, Streamlit, HTML, CSS

Cloud: AWS Basics, Google Cloud AI Studio

PROJECTS

AI Job Assistant

Tech: Python • Streamlit • OpenAI API • LangChain • RAG • Embeddings

Developed an AI-powered Job Assistant using Python, Streamlit, OpenAI APIs, LangChain, embeddings, and Retrieval-Augmented Generation (RAG). Implemented intelligent resume parsing, job matching, and skill-gap analysis using vector search and prompt engineering techniques.

■ <https://ai-job-agent-gr25csbs3lfxh9ehs5frqr.streamlit.app/>

CommunityDNA

Tech: Next.js • Supabase • Gemini API • Tailwind CSS

AI-powered community matching platform that intelligently connects people with communities based on their skills, interests, goals, and preferences using AI recommendations.

■ <https://community-dna.vercel.app/login>

Social Media Sentiment Analysis

Tech: Python • Machine Learning • NLP • Pandas • Scikit-learn

Built an NLP-driven platform that analyzed real-time social media data. Applied text embeddings, time-series analysis, and visualization to correlate public sentiment with financial markets.

CERTIFICATIONS

- Claude Code in Action — Anthropic
- Generative AI Studio — Google Cloud
- Advanced Software Engineering — Walmart
- Introduction to Microsoft 365 Copilot — Microsoft
- Solutions Architecture — AWS
- Internal Audit Job Simulation — Goldman Sachs
- Cyber Job Simulation — Deloitte
- AI Tools Workshop — Be10x

LEADERSHIP & PROJECT EXPERIENCE

- **AI-Powered Job Assistant & Sentiment Analysis (Team Lead)**

Collaborated with a team to develop an AI-powered Job Assistant using Python, NLP, and OpenAI APIs. Led the design of a Retrieval-Augmented Generation (RAG) workflow that analyzed resumes, matched job roles, and identified skill gaps. Also worked with a team on a Social Media Sentiment Analysis platform, applying embeddings, NLP, and time-series analysis to correlate public sentiment with financial markets.

- **TiE Global Hackathon × Rajasthan DigiFest — Top 3 Placement**

Led a team of four to build **RajSavera**, an AI model designed to generate personalized travel guides for tourists exploring Rajasthan. The project earned a top 3 placement, strengthening leadership, teamwork, and AI solution development skills.
